EDUCATION

University of Scholars - *Bsc in Computer Science and Engineering*

AUG 2022 - PRESENT

Focused on developing skills in programming, algorithms, and software development.

ACTIVITES

3rd Intra University Programming Contest

Participated in coding challenges and algorithm-based problem solving.

Project Showcase Competition 2023

Developed and presented the Smart Irrigation System (VOVO Circuit), showcasing innovation in smart agriculture.

1st Intra University Robo Soccer Tournament

Contributed to building a robotic soccer player, competing in a university-level robotics event.

4th Intra University Programming Contest

2nd Runner-Up for excellent performance in solving algorithmic challenges.

Beyond Boundaries-24: An Intra University Competition

3rd Place in Poster Presentation, demonstrating creativity and effective communication skills

LANGUAGES

Bengali (native) and English (Intermediate)

SKILLS

Languages - HTML, CSS, JavaScript, C/C++ and Java

Frameworks - TailwindCSS, React.js, Express.js

Problem-Solving - Algorithm design and optimization, Debugging and code efficiency

PROJECTS

Pixel Shop - Art and craft

Technologies Used: React.js , tailwind css , MongoDB , Firebase , Express.js

Features:

- Easily manage artworks with create, read, update, and delete features.
- A visually appealing interface enhances the shopping experience.
- Enjoy a seamless experience across devices—desktop, tablet, or mobile.

ReFork - E-Commerce Shop

Technologies Used: React.js , tailwind css , MongoDB , Firebase , Express.js , JWT

Features:

- JWT Authentication: Utilizes JSON Web Tokens (JWT) for secure and efficient user session management.

Void Gadget - Gadget Shop

Technologies Used: React.js , tailwind css , MongoDB , Firebase , Express.js , JWT

Features:

- Seller dashboard with options to add, edit, or delete products.
- Admin dashboard to manage users and roles.
- Wishlist and Cart functionality
